To secure a Software Developer or Full Stack Developer position in a reputed IT company where I can leverage my expertise in both front-end and back-end technologies to build scalable, efficient, and user-centric applications, while continually enhancing my skills in a fast-paced environment.

PROJECTS

Personal Portfolio Website, <https://mukila210.github.io/portfolio/>

This site is designed and developed using pure HTML, CSS, and JavaScript to showcase my skills, projects, and professional journey. It features a clean and responsive layout to ensure a smooth experience across all devices. You'll find detailed sections about me, my technical expertise, and real-world projects I've worked on. Interactive elements and smooth transitions enhance the user experience. Each project includes descriptions, tech stacks used, and live/demo links where applicable. There's also a contact form if you'd like to get in touch directly. I've built this site from the ground up to reflect my passion for coding and UI/UX design. Feel free to explore all the sections to get a complete picture of my work and capabilities.

E-Commerce Website, <https://mukila210.github.io/e-commerce/>

I developed a fully functional e-commerce website using HTML, CSS, and JavaScript. The site features dynamic product listings, a shopping cart system using local storage, and responsive design for all screen sizes. I implemented form validation for secure checkout processes and focused on creating a clean, user-friendly interface. Emphasis was placed on performance optimization, cross-browser compatibility, and accessibility. The website delivers a smooth shopping experience with intuitive navigation and fast loading times, ensuring high user engagement.

EDUCATION

May 2022
